PROFILE

Senior Full-Stack Engineer with 11+ years of experience building ASP.NET Core APIs, Angular and Blazor web apps, and the mobile apps that consume them. I have delivered multi-tenant SaaS and ERP platforms end to end on Azure, from data model and API design to security hardening, CI/CD and infrastructure as code with Bicep. Strong mobile background in Android, iOS and Flutter, and I bring AI into products with Azure AI Foundry and into my workflow with agentic development in Kiro.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core Web API, .NET 10, Entity Framework Core, REST, GraphQL, JWT, Java Spring, Node.js

Frontend: Angular, TypeScript, Blazor Server, Electron, HTML/CSS

Data: SQL Server, MySQL, Firebase

Cloud & DevOps: Azure App Services, Key Vault, Service Bus, Application Insights, Static Web Apps, Bicep, Azure DevOps CI/CD, Git

Architecture: Clean Architecture, SOLID, Design Patterns, Dependency Injection, multi-tenant SaaS, MVVM

Security: Token-based authentication, HttpOnly cookie sessions, rate limiting, tenant isolation, PII encryption, OWASP, reCAPTCHA Enterprise

AI: Agentic AI, LLM integration, Azure AI Foundry, AI-assisted development, Kiro

Mobile: Kotlin, Jetpack Compose, Swift, SwiftUI, Flutter

Integrations: Google Maps Platform, FCM, Hikvision and Dahua device APIs

PROFESSIONAL EXPERIENCE

GLOBANT, Guadalajara, México

Oct. 2021 – Present

Android & Flutter Developer

- Build features for enterprise clients with Jetpack Compose and Flutter following Clean Architecture, MVVM and Bloc, with Hilt for dependency injection.
- Integrate GraphQL and Contentstack, build Splunk monitoring dashboards and implement analytics tracking for new features.
- Introduced feature flags, reduced technical debt, implemented biometric login and led internal tech talks.

GOCO SYSTEMS – LetIn

Feb. 2024 – Oct. 2026

Full-Stack Developer (contractor)

- Developed LetIn, a multi-tenant residential community management platform: a .NET 10 API on Azure, an Angular admin portal, an Electron desktop app and Android/iOS apps.
- **Backend:** Built the ASP.NET Core Web API with Entity Framework Core, MySQL and JWT, organized in feature modules for access control, bookings, payments and debts, and panic alerts; migrated it to .NET 8 and .NET 10 and refactored 50+ controllers to a shared repository pattern.
- **Web:** Built the Angular + PrimeNG portal for managers, associates and platform admins, covering residents, fees and payments, expenses, financial reports and bulk imports, plus an Electron app that syncs faces to Hikvision and Dahua devices.
- **AI & Messaging:** Built an AI resident assistant on Azure AI Foundry and notifications through Azure Service Bus and FCM.
- **Security & DevOps:** Added HttpOnly cookie sessions, rate limiting, tenant isolation, Key Vault secrets and PII encryption; created Dev/Prod environments with Bicep, Application Insights and Azure DevOps CI.
- **Mobile:** Built the Android (Jetpack Compose) and iOS (SwiftUI) resident apps and published the Android app on Google Play.

NEODEVELOP – FletaMas

Apr. 2026 – Sep. 2026

Full-Stack .NET Developer (contractor)

- Developed ERP modules for a logistics platform built with .NET 10, Blazor Server, ASP.NET Core Web API, Entity Framework Core and SQL Server, deployed to Azure through Azure Pipelines.
- **Accounts Receivable:** Built the collections module with a per-client dashboard for credit risk, aging and payment behavior, and blocking of overdue clients from scheduling trips.
- **Accounts Payable:** Developed supplier payables features, including bank accounts and validations that prevent negative balances.

- **Inventory:** Built stock per warehouse with minimum, maximum and reorder alerts, manual and automatic movements, and purchase-order reception with warehouse-level permissions.
- **Fleet Geolocation:** Developed GPS position ingestion, real-time route tracking on Google Maps and geofence management.

SATEG **2025**

Instructor – Google Maps API Training (freelance)

- Designed and delivered an 8-module Google Maps Platform course with Web (JavaScript/TypeScript, Node.js), Android and Flutter examples.

HDI SEGUROS **2024 – 2025**

Android Developer – Ajustador Móvil app (contractor)

- Built a digital claim-forms module shared via email or WhatsApp, and remediated pentest and Checkmarx SAST/SCA findings, including reCAPTCHA Enterprise and API key hardening.

NEODEVELOP, León, México **Sep. 2019 – Oct. 2021**

Tech Lead Jul. 2020 – Oct. 2021

- Built a centralized multi-application login that unified the client's user management and issued access tokens for each of its applications, using C# (.NET) and Angular, deployed to Azure across development and production.
- Introduced Scrum and set up CI/CD pipelines in Azure DevOps to build and publish artifacts.

Android Developer Sep. 2019 – Jun. 2020

- Built Android features with BLE printers, barcode scanners and Firebase.

FREELANCE **2020**

Web Developer – Package Tracking Portal

- Built a Blazor (C#/.NET) web app showing each shipment's status and location on an interactive map, deployed to Azure.

SYNERGY SYSTEMS, León, México **Dec. 2017 – Aug. 2019**

Innovation Architect · Tech Lead · iOS Developer

- Built REST web services with .NET Framework and Java Spring, integrated AWS SMS notifications and a chatbot, and implemented GraphQL in a proof of concept.
- Coordinated a Smart TV dashboard app and maintained iOS (Swift) and Android apps.

EARLIER EXPERIENCE

- **INCEPTIO · Xamarin Developer · Oct. 2016 – Nov. 2017:** cross-platform apps and REST web services with .NET deployed on Azure.
- **INNOTEK · Android & Web Developer · Dec. 2014 – Sep. 2016:** Android apps and web modules with PHP, MySQL and REST services.

LANGUAGES

Spanish (native) · **English** (advanced, full professional proficiency)

EDUCATION

B.S. in Systems Engineering **Jun. 2021 – Jan. 2024**

UVEG · Guanajuato, México
