PROFILE

Senior Mobile Engineer with 11+ years of experience building native Android (Kotlin, Jetpack Compose) and iOS (Swift, SwiftUI) apps and cross-platform apps with Flutter. I have taken apps from first commit to Google Play, built QR and facial-recognition access-control apps, and hardened mobile apps against OWASP pentest findings. Strong in Clean Architecture, MVVM, Hilt and Coroutines, with full-stack .NET and Azure experience to build the APIs behind my apps, and daily agentic development with Kiro.

TECHNICAL SKILLS

Android: Kotlin, Jetpack Compose, Material 3, Coroutines, Flow, Hilt, Retrofit, DataStore, CameraX, ML Kit, Custom Views, Accessibility, BLE, R8/ProGuard

iOS: Swift, SwiftUI, Keychain, APNs, Face ID

Cross-platform: Flutter, Dart, Bloc

Architecture: Clean Architecture, MVVM, SOLID, Design Patterns, Dependency Injection, Unit Testing

Mobile Platform: Firebase, FCM, Crashlytics, Google Maps SDK, REST, GraphQL, Google Play and App Store release, CI/CD

Security: OWASP Mobile Top 10, SAST/SCA remediation, reCAPTCHA Enterprise, biometric authentication, API key hardening

AI: Agentic AI, LLM integration, Azure AI Foundry, AI-assisted development, Kiro

Backend & Cloud: C#, ASP.NET Core, Azure, Azure DevOps, SQL Server, MySQL

PROFESSIONAL EXPERIENCE

GLOBANT, Guadalajara, México

Oct. 2021 – Present

Android Developer

- **UI & Architecture:** Built custom views and Jetpack Compose screens following MVVM and Clean Architecture.
- **Accessibility & Testing:** Improved app accessibility, reduced technical debt, introduced feature flags and stabilized flaky tests.
- **Data & Analytics:** Integrated GraphQL and Contentstack, built Splunk monitoring dashboards and implemented analytics tracking for new features.
- **Security & DI:** Implemented biometric login and integrated Hilt for dependency injection.
- **Communication:** Presented feature demos to the client and led internal tech talks.

Flutter Developer

- **UI & Navigation:** Built configurable AppBars, PageViews and a custom bottom navigation bar with state preservation.
- **Architecture:** Applied Clean Architecture with Bloc for state management, freezed for immutable models and Firestore as the backend.
- **Maps & Location:** Integrated Google Maps with real-time geolocation, custom markers and dynamic route generation.

GOCO SYSTEMS – LetIn

Feb. 2024 – Oct. 2026

Full-Stack Developer (contractor)

- Developed LetIn, a multi-tenant residential community platform with resident, guard and kiosk mobile apps backed by a .NET API on Azure.
- **Android:** Built the resident app from scratch in Kotlin with Jetpack Compose, Clean Architecture, MVVM, Hilt, Retrofit and Coroutines, including biometric login, bookings, visitor access, payments, FCM push with deep links and Spanish/English localization.
- **iOS:** Built the SwiftUI resident app with Face ID, bookings and push notifications; set up Dev/Prod build configurations and Keychain session storage.
- **Release:** Published v1.0.0 on Google Play with build flavors, release signing, R8/ProGuard and security hardening for biometrics, backups and WebViews.
- **Access Control:** Built guard and kiosk apps with CameraX and ML Kit QR scanning that open gates over LAN on Hikvision and Dahua devices.

NEODEVELOP – FletaMas **Apr. 2026 – Sep. 2026**

Full-Stack .NET Developer (contractor)

- Built accounts receivable, accounts payable, inventory and fleet geolocation modules (GPS tracking on Google Maps, geofences) for a logistics ERP on .NET 10, Blazor and Azure.

SATEG **2025**

Instructor – Google Maps API Training (freelance)

- Designed and delivered an 8-module Google Maps Platform course with Web, native Android (Kotlin) and Flutter examples.

HDI SEGUROS **2024 – 2025**

Android Developer – Ajustador Móvil app (contractor)

- **Digital Claim Forms:** Built a module that generates claim forms digitally and shares them via email or WhatsApp, replacing handwritten paper forms.
- **Security:** Fixed vulnerabilities from a third-party mobile pentest (OWASP) and Checkmarx SAST/SCA scans, including insecure storage, exported components and outdated dependencies.
- **Hardening:** Integrated reCAPTCHA Enterprise against brute-force attacks and secured the Google Maps API key with app and API restrictions.

NEODEVELOP, León, México **Sep. 2019 – Oct. 2021**

Tech Lead Jul. 2020 – Oct. 2021

- Introduced Scrum, set up CI/CD in Azure DevOps and managed app distribution through MDM for production and beta channels.
- Modernized the Android app with Jetpack libraries and added location tracking with the Google Maps API.

Android Developer Sep. 2019 – Jun. 2020

- Integrated Bluetooth Low Energy printers and barcode scanners, and built UI animations and interactions that improved the user experience.

SYNERGY SYSTEMS, León, México **Dec. 2017 – Aug. 2019**

Innovation Architect · Tech Lead · iOS Developer

- Maintained native iOS (Swift) and Android apps, implemented OCR and Firebase, and published Flutter apps to Google Play and the App Store.
- Implemented BLE beacons for location monitoring and led integrations such as AWS SMS notifications and a chatbot.

EARLIER EXPERIENCE

- **INCEPTIO · Xamarin Developer · Oct. 2016 – Nov. 2017:** cross-platform Android and iOS apps with MVP, released to both stores.
- **INNOTEK · Android & Web Developer · Dec. 2014 – Sep. 2016:** native Android apps in Java with Google Maps and REST services.

LANGUAGES

Spanish (native) · **English** (advanced, full professional proficiency)

EDUCATION

B.S. in Systems Engineering **Jun. 2021 – Jan. 2024**

UVEG · Guanajuato, México
